

Chlamydia information for Men

Chlamydia is hard to see.
Some people do not show any signs.

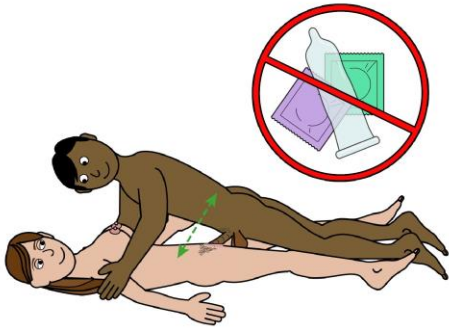

sex

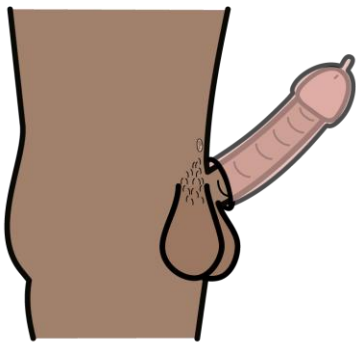

Chlamydia is an infection which one person can give to another through unprotected oral, anal or genital sex.

Men and women can get Chlamydia if you have unprotected sex.

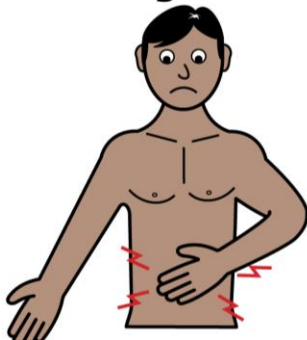

Unprotected sex is when the man or woman doesn't wear a condom.

Using condoms every time you have sex can stop you getting Chlamydia.

Using condoms will also stop you getting other infections too.

tummy ache

Some people with Chlamydia have pain in their tummy below the tummy button.

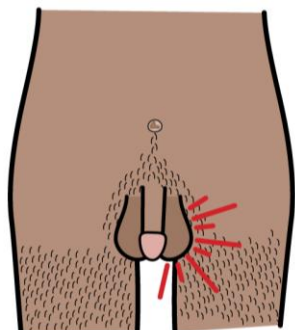

Or pain when peeing.

Or pain when having sex.

**painful
testicles**

Or pain in their testicles (balls).

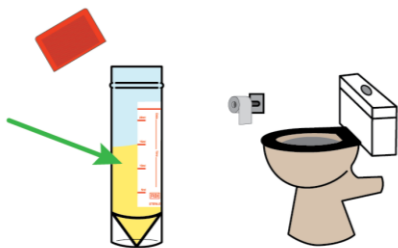

How do I know if I have Chlamydia?

urine sample bottle

To find out if you have Chlamydia you need to give a 'urine' or wee sample.

urine sample

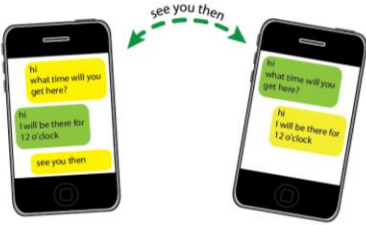

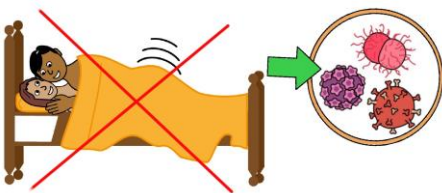

Go to the toilet and pee into the pot.

Screw the lid on firmly.

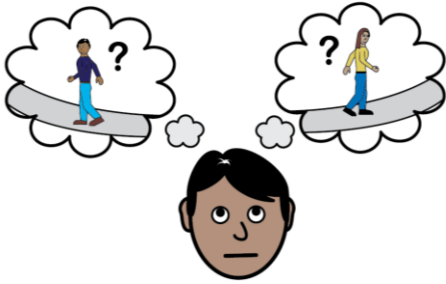

Leave the sample in the small hatch in the toilet

What happens if I have Chlamydia?

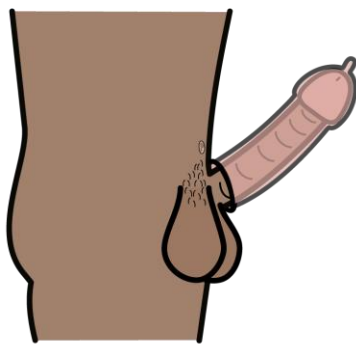

text 	What happens if I have Chlamydia? You will receive a text or a phone call to inform you of your results
	If Chlamydia is found, you will be given some tablets to take. It is important that you take all of them.
	You should not have any sex while you are taking treatment. To avoid spreading the infection.

who did I go with

It is important that we know who else you have had sex with.

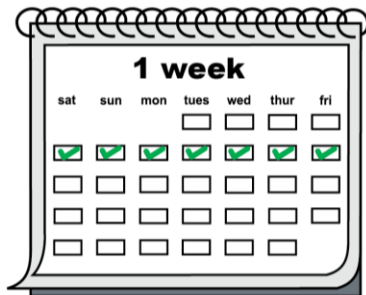

They may need us to help them too.

Using condoms every time you have sex can stop you getting Chlamydia.

Using condoms will help stop lots of other nasty diseases too.

1 week

After a week or so the Dr or Nurse will call you to see if you have finished your tablets and check you are feeling better.
