

Contenance Service for children and young people video transcript

0:00:00.320,0:00:07.280

We are the paediatric bladder and bowel service.
We are a team of specialist nurses and healthy

0:00:07.280,0:00:13.600

bladder and bowel nursery nurses. We help
children and young people who have continents

0:00:13.600,0:00:21.280

issues that affect their day-to-day life such
as delayed toilet training, daytime wetting,

0:00:21.280,0:00:28.720

treatment resistant nighttime wetting, pelvic
floor problems, and chronic constipation. If your

0:00:28.720,0:00:34.640

child's only continent's problem is bedwetting,
please speak to the school nursing service

0:00:34.640,0:00:42.800

for help. We provide advice on therapies and
treatments. And if your child is attending school,

0:00:42.800,0:00:50.240

we will work with the staff so that they can also
provide support. If your child has additional

0:00:50.240,0:00:57.120

needs, you will need to attend our healthy bladder

and bowel workshop. You can book a place using the

0:00:57.120,0:01:04.400

form on our web page. To access our service, your child will need to be referred by a health care

0:01:04.400,0:01:10.400

professional who has provided initial advice on bladder and bowel management for at least

0:01:10.400,0:01:18.160

3 months. This health care professional might be a health visitor, school nurse, community nurse,

0:01:18.160,0:01:24.720

GP, or paediatrician. When we have received your referral, we will assess your child's

0:01:24.720,0:01:31.040

history and send charts for you to complete. Following this, your child will be offered an

0:01:31.040,0:01:38.640

appointment. Appointments are held in person at clinics across Berkshire. You can find out

0:01:38.640,0:01:46.880

more information about the paediatric bladder and bowel service and what we offer on our web page.
