

Community Based Neuro-Rehabilitation service video transcript

0:00:01.120,0:00:06.560

We are the community-based neuro
rehabilitation team also known as

0:00:06.560,0:00:13.120

CBNRT. We are a multi-disciplinary team
offering a specialist rehabilitation for

0:00:13.120,0:00:19.440

challenges linked to neurological conditions
such as stroke, multiple sclerosis or head

0:00:19.440,0:00:26.880

or spinal injuries. Our team includes speech
and language therapists, physiotherapists,

0:00:26.880,0:00:34.320

occupational therapists, neuropsychologists,
and therapy assistants. To access our service,

0:00:34.320,0:00:39.920

you need to be aged 18 or over and
registered with a GP in West Berkshire,

0:00:39.920,0:00:47.600

Wokingham or Reading. Our aim is to help you
be as independent as possible and reach your

0:00:47.600,0:00:54.240

rehabilitation goals. Depending on your needs,

we may work on improving your memory, carrying

0:00:54.240,0:01:02.160

out daily tasks, or helping you communicate.

We can deliver rehab at your home or in the

0:01:02.160,0:01:09.760

community settings linked to your goals, including
leisure centers, supermarkets, or your workplace.

0:01:10.480,0:01:15.520

You can be referred to us following a
stay in hospital, but we have a wait list,

0:01:15.520,0:01:22.000

so it may be a good idea for you to be referred
to an alternative service. If you have previously

0:01:22.000,0:01:29.680

been treated by us, you can self-refer. When we
have received your referral, it will be assessed

0:01:29.680,0:01:37.120

by the clinical team and we will make contact.
If you are suitable for the service and accepted,

0:01:37.120,0:01:45.200

you will be sent a letter with our contact details
on. If we are unable to offer the service to you,

0:01:45.200,0:01:52.320

we will recommend other suitable services as
appropriate. You can find more information about

0:01:52.320,0:02:00.160

the community-based neuro rehabilitation
team and what we offer on our web page.
